

Rev B – digital interface with open-drain video and sound pads. The paddles do not fit the pin budget.

Pin map verified against both Sipeed board revisions (3672 and 3674), which agree. Of the 48 header pins only 29 are usable 3.3 V GPIO: 8 are BANK3 at 1.8 V, 8 are HDMI differential pairs, 3 are power. Rev B uses all 29, with none spare.
